

Ramarao Iragavarapu

Legal name: Madhu Satya Ramarao Iragavarapu

Senior Frontend Developer · React · React Native · TypeScript · Design Systems · MCP / AI Tooling

Pontiac, Michigan · imsramarao6669@gmail.com · linkedin.com/in/ramarao-react · github.com/IMSRamarao

HIGHLIGHTS

- **Built the Dream MCP** at UWM — a Model Context Protocol server exposing the 86-component design system as Claude tools, letting engineers scaffold a full page from one prompt using only DS primitives.
- **Authored 20+ complex production components** in the Dream Design System: Gauge, Bar / Pie Chart, PDF Viewer, Audio + Video Players, Date Range Picker, Autocomplete, Stepper, Time Picker, Slider, Action Icon — most extended from MUI and re-tuned to brand type, color, and motion.
- **2.5 years on a single Florida Blue / BCBS engagement** across three contracting employers — public-facing healthcare app on web + React Native: in-network and out-of-network search, claims, provider profiles, tabbed cost / compare / location-map flow. Every page in production.
- **Mentored 12 developers across roles** — 10 juniors through the full Agile loop at Atos (while shipping the Baylor Scott & White Virtual Waiting Room + Prayer Wall features), and 2 on the Florida Blue engagement (PR reviews, story assignment, daily pairing).

CORE SKILLS

Languages: TypeScript, JavaScript, HTML, CSS, Dart

Frameworks & Libraries: React, React 19, React Native, Next.js, Vite, Node.js, Express, Flutter

UI & Design Systems: MUI (Material UI), Storybook, Figma, Tailwind CSS, NativeWind, Design Tokens, Theming, Accessibility (WCAG)

Mobile: React Native, Expo, Reanimated, Gesture Handler, React Navigation, Detox

State Management: Redux Toolkit, Redux Saga, Redux Thunk, Context API, Apollo Client, TanStack Query

AI & Tooling: Model Context Protocol (MCP), Claude, Tool Calling, Codeium, GitHub Copilot

Testing: Jest, Detox (E2E mobile), Mocha, Vitest, React Testing Library

Practice: Agile / Scrum, JIRA, Mentoring, Code Review, REST APIs, MongoDB, Angular

PROFESSIONAL EXPERIENCE

Senior Frontend Developer · United Wholesale Mortgage

June 2025 — Present

Pontiac, Michigan · Full-time

- Lead frontend engineer on the **Dream Design System** — 86 React components, 560+ design tokens, 607 icons, dual theme palettes — consumed by every product team in the org.
- Personally authored **20+ of the more complex components** from scratch or extended from MUI: Gauge, Bar / Pie Chart, PDF Viewer, Slider, Autocomplete, Stepper, Action Icon, Time Picker, Date Range Picker, Audio + Video Players. Re-tuned to brand typography, color, and motion.
- Co-built the **Dream MCP server**: a Model Context Protocol integration that exposes every DS component, token, icon, and usage guideline as Claude tools. Engineers describe a page in one prompt and Claude scaffolds the full implementation.
- Reviewed, refined, and stabilized components across the catalog; partnered daily with design and engineering across multiple product lines.

Tech: React, TypeScript, MCP, MUI, Storybook, Figma, Reanimated.

Senior React / React Native Developer · Florida Blue / Blue Cross Blue Shield

Jan 2023 — Jun 2025

Contracted via SmartInt Inc → Lanco Global Systems → Zia Global · Remote · 2.5 years on the same engagement

- Shipped **2.5 years of production frontend work** on the public-facing Florida Blue member application — both web and React Native — across three successive contracting employers; engagement and codebase remained continuous.
- Built and refined the **in-network and out-of-network search experiences end-to-end**: provider list pages, doctor profile pages, single-claim and multi-claim views, and a tabbed provider experience covering cost details, compare providers, select / edit providers, and a **live map view** of provider locations. Every page in production.
- Started by redesigning the out-of-network pages flow during my CPT period and grew the role through three successive contracts as the engagement scaled.
- Drove **React major-version upgrades** across the codebase and resolved a long backlog of **security vulnerabilities** while sustaining feature velocity.
- **Mentored 2 developers** — reviewed their pull requests, assigned stories from the JIRA backlog, paired on day-to-day tasks, and helped them land their first production features cleanly.
- Operated in a JIRA-driven, sprint-based team with regular production releases and active code-review culture.

Tech: React, React Native, TypeScript, Redux, REST APIs.

React Native Developer · Atos Syntel

Dec 2019 — Dec 2021

Pune, India · Full-time

- Joined directly after my Bachelor's; completed an intensive in-house React + React Native training.
- Shipped two internal projects — **Track-IT** (asset management) and an **event management application** — and **mentored a team of 10 junior developers** through the full Agile lifecycle.
- Worked on **Baylor Scott & White Hospital's** mobile application (one of the largest hospital systems in Texas): built the **Virtual Waiting Room** with hotspot-driven layered animations, and the **Prayer Wall** — community feed with like / comment / edit / swipe-to-delete using gesture-driven motion.

Tech: React Native, Redux, CSS animations, Gesture Handler.

MEAN Stack Developer (Intern → Developer) · Krify Solutions

2018 — Mar 2019

Kakinada, India

- First professional role. Learned the full MEAN stack — MongoDB, Express, Angular, Node.js — and built an end-to-end internal application from scratch to demonstrate the skills.

EDUCATION

Master of Science, Computer and Information Sciences

Dec 2021 — 2023

Southern Arkansas University · Magnolia, Arkansas

Bachelor of Technology, Computer Science and Engineering

Mar 2019

Jawaharlal Nehru Technological University, Kakinada · India

SELECTED PROJECTS

Dream Design System & Dream MCP — UWM · 2025

86 React components, 560+ tokens, 607 icons, dual theme palettes. Built the MCP server that lets Claude scaffold complete pages from one prompt using only DS primitives.

Florida Blue / BCBS Member App — 2.5-year engagement via SmartInt → Lanco Global → Zia Global · 2023 — 2025

Public-facing healthcare app on web + React Native. In-network / out-of-network search, claims, doctor profiles, provider lists, tabbed cost / compare / select / edit / map flow. All pages in production. Mentored 2 developers across the engagement.

Aurora Glass Portfolio + MCP Live Demo — Personal · 2026 github.com/IMSRamarao/ramarao-portfolio

Personal portfolio (Vite + React + TypeScript) with a working MCP server simulator that exposes career data as nine tools and visualizes protocol-accurate JSON-RPC traffic end-to-end.

PokemanShop — Personal RN side project · 2024 github.com/IMSRamarao/PokemanShop

TypeScript React Native e-commerce / catalog app: Home, Cart, Payment, Pokeman, Single Product. Redux Toolkit, Tab + Native Stack navigation, NativeWind / Tailwind, Jest tests for every screen.
